

Dear Colleagues,

with this letter we invite you to participate in the IV All-Russian Conference with international participation " **The application of Remote Sensing of the Earth in Agriculture**". The Conference will take place at the Agrophysical Research Institute, Saint-Petersburg, on 19-20 September 2024. The Organizing Committee would encourage papers on the following topics:

- Remote sensing application in agro-ecosystems monitoring.
- Methods, algorithms and systems of processing, fusion and interpretation of remote sensing data for information support of agriculture management.
- Remote sensing technologies for precision agriculture: application experience and development prospects.
- Remote sensing of phytosanitary condition of agroecosystems.

Abstract submission deadline is **April 19th, 2024**.

Full paper submission is **June 28th, 2024**.

[Registration form](#)

Abstract submission: conference.dzz@agrophys.ru

The objective of the Conference is to provide the interdisciplinary and creative scientific environment for discussing new ideas on developing new approaches and methods of processing, analysis and use of remote sensing data to solve various applied tasks in agriculture.

We are looking forward to meeting many of you at this triennial scientific event for current and future discussions.

Best regards,

On behalf of the Organizing Committee

Dr. Svetlana Blokhina
