

CONTENTS

Physics, Biophysics and Ecology of Soils

Influence of modified glauconites on soil structure improvement	
Bikkinina L. M.-Kh., Prishchepenko E. A., Aliev Sh. A., Sukhanova I. M., Ilyasov M. M.	1
Comparative analysis of soil moisture and water-holding capacity under different tillage technologies in conditions of dry steppe of Western Siberia	
Bondarovich A. A., Ponkina E. V., Schmidt G., Illiger P.	6
Influence of polymer gels on range of available moisture of sod-podzolic soil	
Danilova T. N.	17
Investigation of large dolomite particles dissolution rate in acidic sod-podzolic sandy loam soil according to laboratory experiment	
Pavlova O. Yu., Berseneva A. O., Litvinovich A. V., Lavrishchev A. V., Salaev I. V., Bure V. M.	23

Physical, physiological and genetic basis for biological productivity of soil-plant complexes under natural and controlled conditions

Ecological suitability and sustainability parameters of spring barley varieties of omsk breeding according to the indicator «protein collection per hectare»	
Nikolaev P. N., Yusova O. A., Aniskov N. I., Safonova I. V.	29
Technique of digital x-ray seed images preparation for visual image interpretation	
Shchukina P. A., Arkhipov M. V., Gusakova L. P., Priyatkin N. S.	36

Mathematical modeling of processes in the agro-industrial complex and management problems

Prospects for creating universal service for remote ensemble calculations of dynamic models of cultivated plant production process	
Medvedev S. A., Cherayev A. S.	45
