

CONTENTS

Physics, Biophysics and Ecology of Soils

Characteristics of temperature seasonal dynamics of the active soil layer of Valaam Island	
Dmitricheva L. E., Semyonov D. A., Stepanova A. B.	1
Influence of sedimentation on alluvial soil quality in the Oka river floodplain	
Pylenok P. I.	7

Physical, physiological and genetic basis for biological productivity of soil-plant complexes under natural and controlled conditions

Effect of trivalent iron oxide nanoparticles on the activity of ascorbate peroxidase in durum and soft wheat seedlings	
Mammadli G. H.	14
Influence of field microrelief on spatial distribution of weeds	
Shpanev A. M., Smuk V.V., Petrushin A.F.	20
Accelerated assessment of winter wheat (<i>Triticum Aestivum</i> L.) genotypes resistance to negative temperatures	
Jelev N. N., Dascaluc A. P., Jelev D. D.	27
Multifunctional sensor complex for phytomonitoring under intensive photoculture conditions	
Kuleshova T. E., Gall N. R., Udalova O. R., G. G. Panova	33

Physics of the atmosphere active layer, agrometeorology and agroclimatology

Climatic conditionality of the time of agrobiological risks of radiation frosts in the North-West region of Russia	
Kononenko O. V.	40

Mathematical modeling of processes in the agro-industrial complex and management problems

Improvement of agricultural enterprise management with precision farming elements	
Yakushev V. V., Lomakin V. S., Chasovskikh S. V., Matveenko D. A.	46

Physical and agronomical foundations of crop production, land reclamation and land protection management.

Short communication

Problems of fault diagnostics and repairment of drying pipe drainage	
Yanko Yu. G., Petrushin A. F., Mitrofanov E. P., Startsev A. S., Kuzenok E. G.	55
