CONTENTS

Physics, biophysics and ecology of soils

Assessment of agrophysical properties of chernozem in the conditions of transition to soil protection tillage technologies
Belousova E. N., Belousov A. A. 1

Influence of long-term tillage use in crop rotation on structure of tilled soil layer and crop yield
Borin A. A., Loshchinina A. E. **9**

Agroecological assessment of soils on the example of ordinary chernozems of the Krasnodar krai
Gukalov V. V., Barshadskaya S. I., Sedykh V. A., Savich V. I. 16

Influence of biochar and plant residues on assimilation of nitrogen by barley from sod-podzolic soil under an excessive amount of cadmium
Rizhiya E. Y., Iskandirova Y. R., Bankina T. A. 20

Monitoring of soil cover change in the northern forest-steppe zone of the Republic of Bashkortostan (on the example of the Iglinsky district)
Kiseleva A. A., Kurmasheva N. G., Asylbaev I. G., Khasanov A. N., Nizametdinov Z. M. 27

Precision agriculture and animal industry – the newest production technologies of agricultural production on the basis of information technologies

Formation of a database of crop canopy optical characteristics for identification of homogeneous management zones in precision agriculture
Matveenko D. A., Voropaev V. V., Yakushev V. V., Kanash E. V., Blohina S. Yu., Blohin Yu. I., Petrushin A. F., Mitrofanov E. P. 35
