

CONTENTS

Physics, biophysics and ecology of soils

Estimation of chernozem moisture reserves under soil tillage minimization

Belousova E.N., Belousov A.A.

1

Agroeconomic and energy efficiency of the hydrogels application in the field crop rotation

Danilova T. N.

7

Scientific messagee

Calculation of isotopic effects of magnesium in extraction systems using crown esters

Belopukhov S. L., Baibekov R. F., Bochkarev A. V., Zhevnerov A. V., Demin S. V.

14

Physics of the atmosphere active layer, agrometeorology and agroclimatology

Assessment of the dynamics of changes in temperature and humidity factors of productivity, growth and development of crops over the agricultural territory of the Russian Federation

Kononenko O. V.

19

Physical, physiological and genetic basis for biological production of soil-plant complexes under natural and controlled conditions

Brewing quality indicators of barley, nadezhny variety, depending on nutritional conditions

Trukhachev V. I., Belopukhov S. L., Islamgulova R. R., Seregina I. I., Novikov N. N., Dmitrevskaya I. I.
