

CONTENTS

Physics, biophysics and ecology of soils

Modelling the annual dynamics of moisture reserves in one-meter soil layer Varcheva S. E.	1
The structural state of ordinary chernozem under soybean crops on an erosion-prone slope Mishchenko A. V.	8
The influence of manure on the enzymatic activity and phytotoxicity of agrichernozem quasigleic Alekseeva Zh. L., Azarenko Yu. A.	15
Accumulation of organic carbon in heavy loamy soddy-podzolic soil Boitsova L. V., Neprimerova S. V., Zinchuk E. G.	21

*Physical and agronomical foundations of crop production, land reclamation and
land protection management*

Improvement of soybean cultivation technology elements in the forest-steppe of the Middle Volga region Kutilkin V. G.	28
---	----

*Physical, physiological and genetic basis for biological production of soil-plant complexes under natural
and controlled conditions*

High-quality barley varieties from collection nursery Nikolaev P. N., Yusova O. A.	34
--	----

*Precision agriculture and animal industry – the newest production technologies of agricultural production
on the basis of information technologies*

On the question of determining the degree of agricultural technologies intensification based on the analysis of plants optical characteristics by the methods of mathematical statistics Yakushev V. P., Bure V. M., Mitrofanova O. A., Mitrofanov E. P.	40
--	----
