CONTENTS

Physics, Biophysics and Ecology of Soils

Influence of oil pollution on some water-physical properties of podzol soils
Bakina L. G., Gerasimov A. O., Polyak Yu. M., Mayachkina N. V. 1

Biochar effect on the content of total carbon and carbon in structural pools of organic matter in sod-podzolic sandy loam soil
Boitsova L. V., Zinchuk E. G., Neprimerova S. V. 8

Physics of the active layer of the atmosphere, agrometeorology and agroclimatology

Identification of areas prone to over-wetting in the drained lands of the Non-Chernozem Region of European Russia in relation to climate change
Nikolaev M. V. 16

Physical, physiological and genetic basis for biological production of soil-plant complexes under natural and controlled conditions

Using chlorella and spirulina microalgae suspensions for biostimulation of grain seeds germination
Belokurova E. S., Pankina I. A., Volkova S. V. 27

Resistance of radish to cruciferous flea beetles and cabbage flies in the conditions of the North-Western region of Russia
Kornyukhin D. L., Ermolaeva L. V. 34

Anthocyanin content and polymorphism of MYB114 gene in leafy vegetable crops of *Brassica Rapa* L.
Fateev D. A., Artemyeva A. M. 40

Plant physiology and light

Effect of ratios of red and far-red light on physiological and biochemical parameters of potato plants *in vitro*
Lisin T. N., Chetina O. A., Elokhova E. A., Shcherbenok S. V. 47

Physico-agronomical basis for management of crop production processes, amelioration and soil protection

The use of 15N by barley varieties from various fertilizers
Zavalin A. A., Shmyreva N. Ya. 55

Equipment and information for agricultural research and technologies

Geoinformation system of soil cover of The Republic of Bashkortostan Forest-Steppe Zone (short communication)
Asylbaev I. G., Mirsayapov R. R., Z. M. Nizametdinov, Chashchin A. N. 61
