CONTENTS

Physics, biophysics and ecology of soils

Analysis of variation in moisture content of the root-zone soil layer
Zeiliger A. M., Ermolaeva O. S., Chinilin A. V., Kotov Ya. S. 1

Physics of the active layer of the atmosphere, agrometeorology and agroclimatology

Approaches for the scientific support of the national inventory of anthropogenic greenhouse gas emissions from agriculture
Romanovskaya A. A., Bryukhanov A. Yu., Vertyankina V. Yu., Pozdnyakova E. A., Kozlova E. N., Dobrohotov A. V., Buchkina N. P. 8

Geostatistics of expected changes in air temperatures by 2030
Uskov I. B., Uskov A. O., Kononenko O. V. 16

Physical, physiological and genetic basis for biological production of soil-plant complexes under natural and controlled conditions

Development of grain forage crops in the tillering phase as one of the factors of grain yield formation and its quality
Yusova O. A., Nikolaev P. N., Shuliko N. N., Vasyukevich S. V., Kiseleva A. A., Yurtaeva Ya. O. 21

Sunflower yield dependence on weather conditions and functioning features of the pigment complex
Klipakova Yu. A.., Denisova E. M. 29

Physico-agronomical basis for management of crop production processes, amelioration and soil protection

Influence of mobile soil aluminum on yield and biochemical indicators of barley grain quality
Novikov N.N., Naliukhin A.N., Tereshenkov P.V. 35

Influence of intensive agricultural technologies on some agrobiological and agrophysical properties of chernozem soils in the West Siberian forest-steppe
Yushkevich L. V., Yushchenko D. N., Shchitov A. G., Butko A. S., Shmidt A. N. 42

Physical and natural modeling of agricultural processes

Comparison of mathematical algorithms in researching the production process of perennial grasses
Ivanov D. A., Arkhipov S. V., Kurpas K. S. 50

Equipment and information for agricultural research and technologies

Comparison of NDVI, GNDVI, BNDVI, NDII and COASTAL NDVI vegetation indices for assessing forests damaged by the siberian silkmoth
Babiy I. A., Vodnevskay V. S., Zhdanovskiy M. N., Mamyshev R. Sh., Lapko V. A., Lapko A. V., Danilin I. M., Im S. T., Yu. P. Yuronen 60

Application of the NIR spectroscopy for biochemical screening of chickpea seeds (*Cicer Arietinum* L.) from the VIR collection
Safonova E. E., Popov V. S. 71
