CONTENTS

Physics, biophysics and ecology of soils

Pyrogenic loss of carbon from drained eutric histosols in agrolandscapes of the Kaliningrad region
Antsiferova O. A. 1

Effect of chernozem pre-treatment on stable organic matter pool measured by particle-size fractionation technique
Grigorova A. A., Sushko S. V., Pigolev A. V., Neprimerova S. V., Ivaschenko K. V. 10

Physical, physiological and genetic basis for biological production of soil-plant complexes under natural and controlled conditions

Technology of multifunctional application of nematode-bacterial complexes in biological protection of potatoes from pests and diseases
Kotova Z. P., Danilov L. G., Danilova T. A., Tyukalov Yu. A. 17

Study of antioxidant enzyme activity in sunflower seedlings under biotic stress
Rudakova A. S., Cherdivara A. M., Rudakov S. V. 24

Influence of biological products on hyperspectral imaging of grain fodder crops in Western Siberia
Yusova O. A., Shuliko N. N., Tukmacheva E. V., Nikolaev P. N. 32

Plant physiology and light

Effect of led lighting on the content of pigments, flavonoids, proline and carbon in *ex vitro* strawberry (*Fragaria×ananassa*) leaves
Lisina T. N., Elokhova E. A., Pistsova O. N., Latypova A. A. 44

Influence of luminous flux intensity on tomato productivity and quality at various levels of mineral nutrition in regulated agroecosystem
Udalova O. R., Volkova E. N., Mirskaya G. V., Panova G. G. 53
