

CONTENTS

Physics, Biophysics and Ecology of soils

Role of Aquasorb absorbent in improving soil waterholding capacity	
Danilova T. N., Tabybayeva L. K., Kenenbayev S. B., Boiko V. S.	1
Dynamics of agrophysical properties of arable chernozem under the effect of long-term use of mineral fertilizers in the forest-steppe zone of Trans-Urals	
Eremin D. I.	9
Interaction between agrophysical properties and content of nutrients in arable soils of the Uymon valley	
Kudryavtsev A. Ye.	14
Intensity of calcium and magnesium migration from sod-podzolic loamy soil limed with large fractions of screening of crushed stone production	
Salaev I. V., Litvinovich A. V.	22

Physical, physiological and genetic basis for biological productivity of soil-plant complexes under natural and controlled conditions

Introsscopic methods of seed quality evaluation: state of problem and prospects of realization	
Priyatkin N. S., Arkhipov M. V., Gusakova L. P., Potrakhov N. N., Kropotov G. I., Tzibizov I. A., Vinerov I. A.	29
Varieties of marker genetic linkage with target gene and chromosome loci	
Chesnokov Yu. V.	40

Mathematical modeling of processes in the agro-industrial complex and management problems

Dynamic model of grape seasonal development	
Novikova L. Yu., Naumova L. G.	46
Three systems of soil hydrophysical functions with common sets of parameters: verification and comparison using data on clay, loamy and sandy soils	
Terleev V. V., Topaj A. G., Moiseev K. G., Ginevsky R. S., Lazarev V. A.	52

Physical and full-scale modeling of processes in agroecological systems

Estimation of biomass moisture at grass harvesting	
Mikhailenko I. M., Timoshin V. N., Malygin V. D.	62
